

C.I.Agent® Loose Granules/Dissolvable Film Pack

Loose Granules

Dissolvable Film Packs

5 Gallon Pail

**For additional information contact
C.I.Agent® Solutions.**

PRODUCT DESCRIPTION:

C.I.Agent® is a proprietary blend of USDA food grade polymers that is non-toxic, non-corrosive, non-carcinogenic, and non-hazardous. C.I.Agent® is listed on the EPA National Contingency Plan Product Schedule as a "Solidifier" for use on oil spills in the navigable waters of the United States. C.I.Agent® polymers have a long chain molecular structure that is highly cross-linking with organic liquid hydrocarbons, enabling C.I.Agent® to solidify liquid hydrocarbons (sheen, gasoline, diesel, and oils, including crudes) upon contact into an inert solid rubber-like mass that floats.

PRODUCT APPLICATIONS:

C.I.Agent® can be used in loose granule form, dissolvable film packs, pillows, booms, and hydrocarbon flow filters. C.I.Agent® can be effectively used for both spill prevention and clean up. As a spill prevention tool, C.I.Agent® has become the engineered solution for the electric utility industry for SPCC secondary containment and for oil contamination removal in underground vaults and manholes. C.I.Agent® Hydrocarbon Flow Filters, storm drain inserts, and sheen bags can remove hydrocarbons from water to levels below 5ppm without impeding the flow of water. C.I.Agent® can solidify and remove liquid hydrocarbons (sheen, gasoline, diesel, and oils, including crudes) from both fresh and salt water without processing any water.

PERFORMANCE SPECIFICATIONS:

Solidification rate by weight; 4 parts contaminant to 1 part C.I.Agent® Granules; indefinite shelf life.

BENEFITS:

- Solidifies all organic hydrocarbons.
- Works in both fresh and salt water.
- Has no temperature limitations; extreme heat and cold.
- No expensive mechanical equipment required for recovery.
- Cannot sink.
- Renders hydrocarbons into a non-hazardous inert solid rubber-like mass.
- Can be disposed of in most landfills, eliminating the "Cradle to Grave Liability" and fees associated with hazardous waste disposal.*
- Can be 100% recycled as raw material for asphalt, rubber and plastic production, or can be burned as fuel.

AVAILABILITY:

C.I.Agent® is available in loose granule form and in dissolvable film packs in standard quantities packaged by weight: 10 lb., 50 lb., 100 lb., 200 lb., 400 lb., and 800 lb. units. Granules are available in 30 gal., 55 gal., and 95 gal. over packs. C.I.Agent® dissolvable film packs are available in 4 oz., 8 oz., and 16 oz. packets.

*Always check with Local, State, and Federal Regulations prior to disposal.
